CONTRACTS.

EDUCATION

B.S. IN SYSTEMS
ENGINEERING — UNEFA
2020 – 2025 | YARACUY, VE
— 8/10 SEMESTERS
(EXPECTED GRADUATION)

SUMMARY

Results-driven full-stack developer with 3+ years of experience building web solutions and Python automation tools. Transforms data into actionable products, optimizes workflows, and enhances UX. Proficient in end-to-end development (backend → frontend) and thrives in async, distributed agile teams. Fluent in Spanish and English (B2/C1); naturally self-taught.

EXPERIENCE

Full-Stack Web Developer — Community Service Project
Jan 2024 – Jun 2024 | Remote / Yaracuy, VE

- Led end-to-end development of a web app used by 2,000+ users, reducing data query time by 80%.
- Implemented secure CRUD operations with PHP/MySQL and responsive UI → 97% user satisfaction.
- Deployed CI/CD pipelines via GitHub Actions, enabling weekly zero-downtime releases.
- Trained 10 key users and documented processes in Notion.

Metalworks Assistant — Macea Workshop (operational role)
Jun 2023 – Dec 2023 | Yaracuy, VE

- Developed discipline, safety protocols, and project management skills under pressure.

LANGUAGES

- Spanish (Native)
- English (B2/C1)

TECHNICAL SKILLS

- Languages: Python, PHP, JavaScript, HTML5, CSS3
- Frameworks/Libraries: React.js, Next.js, Vue.js, Tailwind CSS
- Database: MySQL, PostgreSQL, MongoDB, Firebase
- DevOps & Tools: Git/GitHub, CI/CD (GitHub Actions), Docker (básico), REST & GraphQL APIs
- Soft Skills: Comunicación asincrónica, trabajo en equipo remoto, pensamiento crítico, autodisciplina

KEY PROJECTS

Dental Clinic Web System | PHP/JS/MySQL
6 MONTHS

- Digitized 100% of patient records and automated billing, saving 6h/week in admin work.
- Built an appointment module with automated email reminders.

Inventory Management for Mini Markets | React.js/Node.js/MongoDB
3 MONTHS

- Real-time dashboard + low-stock alerts. Integrated barcode scanner and POS → 25% accuracy boost.

Data Processing Bots | Python
4 MONTHS

- API-powered bots updating dashboards every 5 mins with Slack alerts. Automated repetitive tasks (~15h/week saved).

AI-Powered Book Recommendation System | Python
2 MONTHS

- Developed a collaborative filtering model (Scikit-learn) processing 10,000+ books.
- Integrated REST API (Flask/FastAPI) for real-time recommendations → 85% user-rated accuracy.
- Automated weekly model retraining using ethical web scraping (reviews).
- Reduced book search time by 70% (user survey metrics).
