PROFILE

Results-driven full-stack developer with 3+ years building web and mobile applications, bots and automations that save hours of work and scale to thousands of users. Experience in the healthcare sector (remote, international) and in management, billing and inventory systems for businesses. I own the full backend and frontend cycle, build mobile apps with Flutter, and follow solid engineering practices (tests and CI). Clear communication in Spanish and English.

WORK EXPERIENCE

Healthcare Sector · Remote

Jan 2026 - Present

SOFTWARE DEVELOPER

- Designed and maintain web and mobile applications for an international healthcare company, including mobile apps with Flutter.
- Digitized key workflows, cutting the time spent on formerly manual, repetitive processes by ~80%.
- Collaborate in a distributed international team (100% remote) using Git, code review and continuous integration to achieve frequent, stable deployments.

Freelance · Remote

2024 - Present

FULL-STACK DEVELOPER

- Build management, inventory and billing systems, and finance apps with Supabase and Flutter, tailored to each client's real processes.
- Automated the processing of large data volumes and repetitive workflows with Python and REST APIs, removing about 21 h/week of manual work across clients.
- Implement automated tests, continuous integration (CI) and technical documentation for reliable, maintainable releases.

Corpoelec · ATIT Area · Yaracuy, VE

Aug 2025 - Jan 2026

IT INTERN

- Provided hardware and software support: installation and preventive and corrective maintenance of equipment and workstations.
- Diagnosed and resolved end-user software issues, keeping the area's operations running.
- Administered networks and servers, including proxy configuration and connectivity.
- Supported the automation of internal IT processes.

Community Service Project · UNEFA · Yaracuy, VE

Jan 2024 - Jun 2024

TECHNICAL LEAD

- Led end-to-end development of a web app used by more than 2,000 residents, cutting data-lookup time by 80%.
- Built a secure CRUD in PHP/MySQL with a responsive UI that reached 97% user satisfaction.
- Set up CI/CD with GitHub Actions and weekly deployments with no service downtime.

EDUCATION

UNEFA · Yaracuy, VE

2020 - 2026

SYSTEMS ENGINEER

Graduated (official degree).
