PORTFOLIO

portfolio-eosin-theta-40.vercel.app

LOCATION

Yaracuy, Venezuela (UTC-4)

AVAILABILITY

Immediate — full-time, part-time or per project.

Prefers remote/hybrid contracts. Time zone LATAM / US-ET.

SKILLS

Languages

Python, PHP, JavaScript, TypeScript, HTML5, CSS3

Frontend

React, Next.js, Vue, Tailwind CSS

Backend & APIs

FastAPI, Flask, Node.js, REST & GraphQL

Databases

MySQL, PostgreSQL, Supabase, MongoDB, Firebase

DevOps & Tools

Git/GitHub, CI/CD (GitHub Actions), Docker, Vercel

Automation & AI

Python bots, ML (Scikit-learn, Pandas), APIs (FastAPI/Flask), spec-driven & ADRs

LANGUAGES

Spanish

Native

English

B2 / C1

EDUCATION

Systems Engineer

UNEFA · Yaracuy, VE

2020 – 2025 · Graduated (official degree)

SOFT SKILLS

Asynchronous communication · remote teamwork · critical thinking · self-discipline

MOISES FLORES

Full-Stack Developer · Automation & AI

PYTHON · REACT · NEXT.JS · PHP

Results-driven full-stack developer with **3+ years** building web applications, bots and automations. Focused on **dual-currency billing and inventory systems (USD/VES with the official BCV rate)** and on solid engineering practices (spec-driven, ADRs, tests and static analysis in CI). I own the full backend → frontend cycle and thrive in async, distributed teams. Clear communication in Spanish and English; self-taught by nature.

EXPERIENCE

Full-Stack Developer — Freelance

Independent projects · 2024 – Present · Remote

- Build **dual-currency inventory and billing systems (USD/VES with the BCV rate)**, finance apps with Supabase, data-processing bots and ML recommendation engines.
- Technical documentation (**ADRs, spec-driven**) with tests (PHPUnit) and static analysis (PHPStan) in CI.
- ~21 h/week** of manual work automated across clients.

Technical Lead — Community Service Project

Local community · UNEFA · Jan 2024 – Jun 2024 · Remote / Yaracuy, VE

- Led **end-to-end** development of a web app used by **2,000+ people**, cutting data-lookup time by **80%**.
- Secure CRUD in PHP/MySQL and a responsive UI → **97%** satisfaction.
- CI/CD with GitHub Actions: weekly deploys with no downtime. Trained 10 key users and documented everything in Notion.

Blacksmith Assistant — “Macea” Workshop

Yaracuy, VE · Jun 2023 – Dec 2023

- Discipline, safety and task management under pressure in a hands-on environment.

FEATURED PROJECTS

PlasticBurger — Inventory & Billing

PHP 8.2 · MySQL

In development

Dual-currency USD/VES billing with the BCV rate (daily sync + offline fallback) and exact-precision money math with **bcmath**. Fully keyboard-driven sales screen, customers with credit limits, role-based permissions and audit log. PHPStan + PHPUnit in CI; documentation and ADRs.

Control de Deudas — Multi-currency Dashboard

Vue 3 · Supabase

2026

Payables and receivables in Bs (BCV), USD and USDT, with a per-fortnight payment planner. Per-user login with **row-level security (RLS)** in Postgres; static Vue + Supabase on Vercel, no server to maintain.

Dental Clinic Web System

PHP · JS · MySQL

6 months

Digitized 100% of medical records and automated billing (**-6 h admin/week**). Interactive odontogram and an appointment module with automatic email reminders.

AI Book Recommender

Python · Scikit-learn · FastAPI

2 months

Collaborative filtering over **10,000+** books, served by a real-time REST API with **85%** user-validated accuracy. Weekly retraining with ethical review scraping.

Data Processing Bots

Python

4 months

Bots that consume APIs and refresh dashboards every 5 min with Slack alerts. Automated repetitive tasks, saving **~15 h/week**.

Preventa — Investment Calculator

JavaScript · Serverless

Live

Real-time quoting for a software project with an automatic BCV rate (serverless function), auditable breakdown and PDF export.
